

Lighting Maintenance Engineer - Mobile / Field based

We have a fantastic opportunity for a Lighting Maintenance Engineer to join us supporting the UK Retail & Commercial markets.

With significant growth and demand for our Lighting Maintenance and Project focused services we now need to expand our Team to meet demand.

If you are a qualified Electrical Maintenance Engineer, to at least City & Guilds 2330 Level 2, are customer focused and want to join one of the longest standing maintenance companies in the industry, then we would like to hear from you.

In return we offer a competitive package, pension, fully expensed company van, mobile phone and private health care.

The Role: Electrical Maintenance Engineer

The Electrical Maintenance Engineer will be required to install, repair and service specialist lighting and LED lighting equipment at retailer's premises.

Responsibilities will include:

- Planning and undertaking scheduled maintenance to deliver a high quality of service at all times.
- Responding to breakdowns reporting and diagnosing faults to ensure electrical safety and repairs to lighting
- Carry out energy surveys and identify opportunities to reduce costs
- Manage your individual van stocks, reordering process must be followed at all times
- Ensure customers are fully briefed at all times, ensuring completed job recorded is accurate, fully completed and signed by the customer

Lighting Maintenance Engineer Key Skills required:

- Electrical Fault Diagnosis
- New Electrical Installations
- New Product Installations
- Understand Technical description of lamps, types and fittings
- Ability to work on your own initiative, enthusiastic, flexible and self-motivated
- Experience working with lighting equipment or similar would be advantageous
- Must be willing and prepared to work outside of shop opening hours and work away
- A clean driving licence preferred
